Work Experience

Cyber Security Intern - Inshield Technologies (August 2024 - August 2024)

- Gained hands-on exposure to network security architecture, including firewalls (NGFW), VPNs, and DMZ design
- Worked with routing, IP addressing (IPv4/IPv6), and enterprise network concepts
- Explored cloud security models such as SASE, ZTNA, and endpoint management using Microsoft Intune
- Studied EDR, SIEM, and SOAR for threat detection and response
- Researched IoT/OT security and Raspberry Pi-based firewall solutions

Cyber Security Intern - Intertec Systems (May 2023 - June 2023)

- Worked under a team of cyber security professionals and contributed to various projects and tasks.
- Conducted site visits to client locations, gaining hands-on experience in the setup and maintenance of data centers.
- Observed and documented the processes involved in building and securing data centers, including physical and digital security protocols.
- Gained knowledge of cybersecurity processes and best practices, enhancing skills in threat analysis, risk management, and data protection.

Technical Skills

Security: SIEM, EDR, Network Security, OWASP Top 10

Tools: Wireshark, Burp Suite, OWASP ZAP

Networking: TCP/IP, DNS, VPNs, Firewalls

Programming: Python, Java

Education

1. University
BSc Computer Science (Hons) - Heriot Watt University, Dubai
2022-2026
2. High School
High School Diploma - Our Own High School, Al Warqa'a, Dubai
2010 - 2022

Certificates

Getting Started with Python - University of Michigan - May 2020

Introduction to Cyber Attacks - New York University Tandon School of Engineering - August 2022
