Hiring Team,
Dubai, United Arab Emirates

Dear Hiring Team,

I am writing to express my interest in a position within your logistics and freight operations department. Having recently completed my Bachelor of Business Administration (BBA) with a specialisation in Business Analytics from Christ University, Bangalore, I am eager to begin my career in the logistics and supply chain industry. I am particularly enthusiastic about gaining hands-on experience in freight forwarding and logistics operations, where I can apply my academic knowledge while continuing to learn and grow professionally.

Through my academic training, I have gained a solid foundation in supply chain management, production and operations management, and data analytics. These courses have provided me with an understanding of how efficient logistics systems support overall business performance. I am particularly interested in applying analytical thinking to real-world logistics challenges such as process optimisation, demand forecasting, and performance evaluation.

Having grown up and completed my schooling in the UAE, I am familiar with the region's vibrant trade and logistics sector. I am motivated to contribute to its continued growth by learning from industry experts and actively supporting operational processes. Since this marks the beginning of my professional journey, my primary goal is to gain valuable experience, enhance my practical skills, and build a strong foundation for a successful career in logistics and freight operations.

Thank you for your consideration, I would greatly appreciate the opportunity to discuss how my educational background, enthusiasm for learning, and commitment to excellence can contribute to your organisation's success.

Sincerely,
Mikhail Mohan Abraham
